

# COLOR WHEEL STUDY SHEET

1. Using tempera paint, complete the color wheel below and then correctly label each color and color triad.

2. Complete the value chart below by using any one color and mixing it with black and/or white to create 5 tonal variations. The pure hue should be in the middle square.

3. Choose 2 complementary colors, mix them together and what do you get. This is known as an intensity scale (brightness or dullness of a color).
